NOTES: If you encounter problems launching the training, there could be a number of causes.

You will want to make sure that your computer is set to the proper specifications outlined in the Specific Requirements section of the course. Verify that you do not have any pop-up blocker turned on, or if you do, add ".defensetravel.dod.mil/passport" to your list of trusted sites. You can check this by going to TOOLS>POP-UP BLOCKER>POP-UP BLOCKER settings.*

Please ensure that you are not getting to Passport by following an external link and instead, go straight to <http://www.defensetravel.dod.mil/passport> to access the site.

While taking the course, the TRAX windows must remain open in the background. If closed, the course completion will not be recorded. When the course is complete, the "View Certificate" button must be pressed when it is displayed. Also, ensure that the course does not indicate that it was "Verified by User". If so, it must be deleted and retaken to allow a certificate to be printed.
